- D Roof Support Hub x 1
- E Roof Support Cap x 1
- F Roof Support Arm x 8
- G Ball Connectors x 8
- H Reversible Kennel Cover x 1
- I Nylon Connector x 16

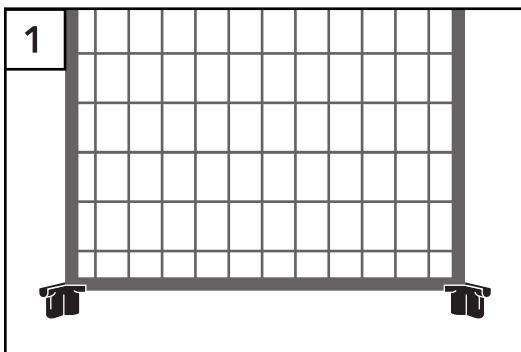

CONGRATULATIONS!

This kennel will provide your pet with a safe, comfortable and attractive place to play whether you're at home or on the road. **The Pet Gazebo** is modular and easily expands to accommodate more of the pets you love!

Follow these instructions to quickly and easily assemble your **Pet Gazebo** without any tools in just a few minutes.

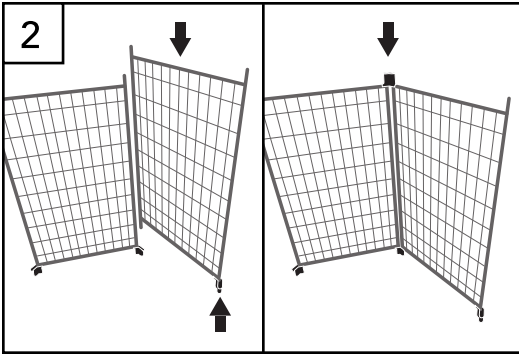

Be sure to check out www.petgazebo.com for great accessories that will make your life with **The Pet Gazebo** even easier!

ASSEMBLY INSTRUCTIONS:

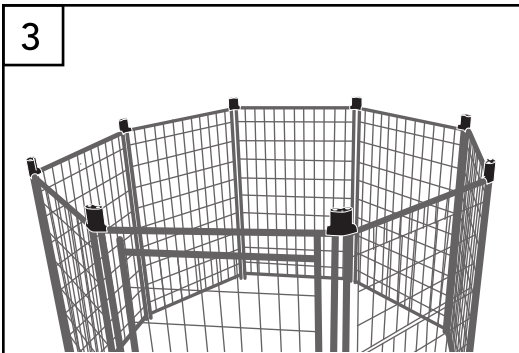

- 1 Begin with two Kennel Side Panels. Place Nylon Panel Connectors on the bottom of both ends of one panel.

Note: All Nylon Panel Connectors are identical.

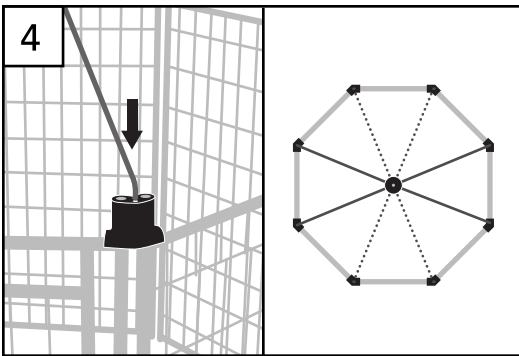

- 2 Place a **Nylon Panel Connector** on to one side of another **Kennel Wall Panel** and insert the second **Kennel Wall Panel** into the available space in the first **Kennel Wall Panel's Nylon Connector**.

Attach a **Nylon Panel Connector** to join the two **Kennel Side Panels** at the top so the piece can stand freely.

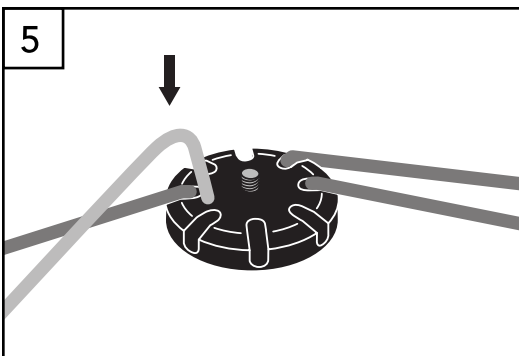

- 3 Repeat these steps until you have an octagonal shape. Make sure the **Kennel Gate Panel** and **Latching Window Panel** are placed where both panels can be opened from the outside.

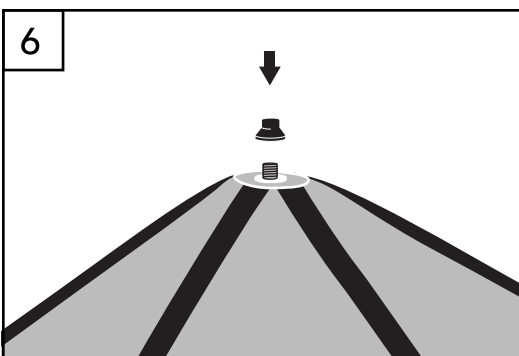

- 4 Insert the end of a **Roof Support Arm** into the second hole of the **Nylon Panel Connector**.

Repeat this step for the remaining seven **Roof Support Arms**.

For stability it is best to start with an "x" pattern. Continue putting the **Roof Support Arms** into place in the **Nylon Panel Connectors**.

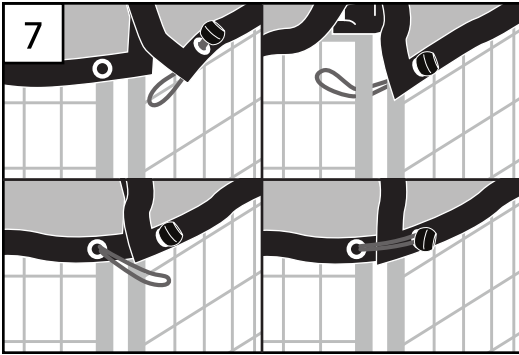

- 5 Insert the tips of the **Roof Support Arms** into the **Roof Support Hub**.

- 6 Pick which side of the **Reversible Kennel Cover** you would like to use and line up the center of the **Reversible Kennel Cover** over the **Roof Support Hub**.

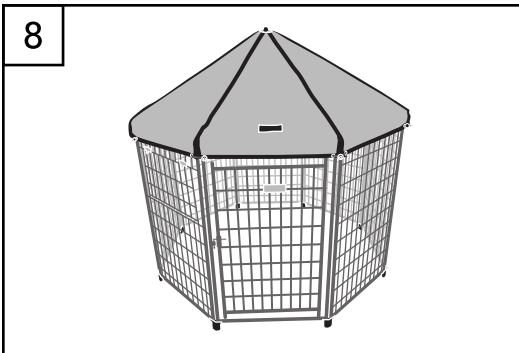

Screw on the **Roof Support Cap** to attach the **Reversible Kennel Cover** to the Kennel.

Note: We recommend using the white side during hot weather to reflect heat and the brown side during cold weather to absorb heat.

7 Using the **Ball Connectors** provided attach the **Reversible Kennel Cover** to the posts of the kennel.

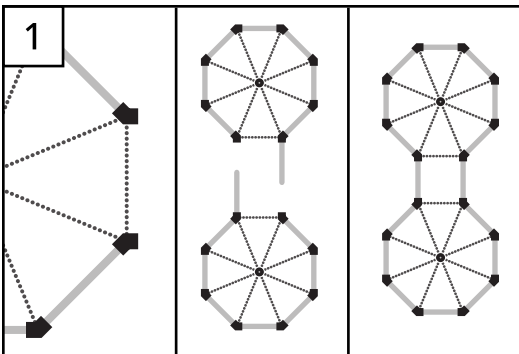

Note: Align the ribs of the **Reversible Kennel Cover** with the posts of the panels. Insert a **Ball Connector** through the eyelet below of horizontal frame bar and wrap around the vertical frame post connecting two panels together.

8 Your Pet Gazebo is now ready to use!

Note: When using your Pet Gazebo outdoors, for safety and stability, your Pet Gazebo must be secured to the ground with ground stakes (sold separately).

CONNECTING MULTIPLE PET GAZEBOS TOGETHER

1 Detach a single **Kennel Side Panel** and its **Nylon Connectors** from a fully assembled Pet Gazebo, then re-attach the **Nylon Panel Connectors** so they turn away from the Pet Gazebo, rather than inward.

Re-attach a **Kennel Side Panel** to each Pet Gazebo so that the panels face outward are on opposite sides.

Attach The Pet Gazebos together by inserting the outward facing Kennel Side Panels in the available **Nylon Panel Connectors**.

WARRANTY

All steel and nylon parts (Includes: panels, arms and connectors) are covered with a 5 year warranty. All other parts (cover and ball ties) are covered with a 1 year warranty.
